

Profile

Conscientious and driven professional with a broad skill set who likes to get things done. Strong attention to detail. Able to multitask and bring multiple projects to completion at once. Focused on building user-friendly, standards-based, visually engaging, web sites from concept to testing. Always excited about the latest technology developments, and constantly striving to expand my capabilities.

Skills

Web Development

Adept at creation of robust web applications. Front-end web development with HTML5/CSS3/Javascript. Previous experience using EmberJS, AngularJS, and NodeJS.

System Administration

Skillful with Linux based servers (Debian and Ubuntu). Knowledgeable in the configuration and tweaking of Apache, Nginx, PHP-FPM, HAProxy, MySQL, and PostgreSQL.

UI Design

Photoshop, Fireworks, and Illustrator wire framing and site planning, focusing on accessible cross-browser code compatible with mobile devices.

Technical

HTML

JQuery

AngularJS

MongoDB

Linux

CSS

NodeJS

BackboneJS

PostgreSQL

OSX

Javascript

EmberJS

MySQL

Git

Windows

Education

Portland Code School

JavaScript Immersion Class

January 2014-Present

The course is designed to teach advanced web development identifying iterative and agile development strategies. It covered both front-end and back-end applications in JavaScript (including: Ember.js, jQuery, and NodeJS). Also accentuated JavaScript best practices, code quality, data encapsulation, closures, binding, inheritance, and name spacing.

Experience

Web-Developer

Freelancer

January 2014-Present

Full-stack JavaScript development with technologies such as Node.js and Ember.js. While keeping up on XHTML/HTML5 and CSS3 best practices, I like to use frameworks such as Bootstrap and SASS to speed up development time. I build web apps that impact and empower the people using them. I have a genuine passion for writing highly-scalable, modular, and well-documented code; deploying responsive 'mobile first' HTML/CSS; and making pixel perfect user-friendly websites.

Riverstone Residential

Assistant Manager

October 2010-May 2014

I worked extensively throughout Portland's luxury high rise luxury apartment/condo buildings. I was promoted into the Assistant Property Manager position following my brief initial success as a Leasing Consultant, establishing a reputation of being able to "up sell anybody". Responsible for community operations, accounts receivable/payable, month-end financial reporting, all leasing and renewal activities, marketing, tenant relations, collections, and resident functions.

Insurance Agent

Independent Sales

February 2007-October 2010

As an independent insurance agent I worked closely with my clients to find the best match of benefits using the strongest insurance companies with the needs of each individual. Being an independent agent I had the freedom to work 'outside the box' to find coverage for my client's one at a time because there is no such thing as one plan is best for everyone. I was able to go beyond my own knowledge base and tap into the skills of the sales experts. Life insurance has many useful dimensions which I was able to learn sophisticated concepts and implement them for my clients.
